

RENEWABLE ENERGY PROGRAM – SCHEDULE GP

Standard Rider

This “Renewable Energy Program” is a rider to all current rate schedules. The purpose of this program is to provide retail members with a source of renewable energy or renewable energy attributes called Renewable Energy Certificates. There are three (3) options. Fleming-Mason Energy, via its participation in East Kentucky Power Cooperative’s (EKPC) Renewable Energy Program (“Envirowatts”), will aggregate the contributions provided by the retail members to develop renewable energy, purchase renewable energy, or purchase Renewable Energy Certificates. Alternatively, the retail member, Fleming-Mason Energy, and EKPC will enter into a special agreement to purchase renewable energy to offset the retail member’s existing energy consumption.

(T)

Applicable

In all territory served.

Definitions

- a) Renewable energy is that electricity which is generated from renewable sources including but not limited to: solar, wind, hydroelectric, geothermal, landfill gas, biomass, biodiesel used to generate electricity, agricultural crops or waste, all animal and organic waste, all energy crops and other renewable certified resources.
- b) A Renewable Energy Certificate (“REC”) is the tradable renewable energy attribute which represents the commodity formed by unbundling the environmental-benefit attributes of a unit of renewable energy from the underlying electricity. One REC is equivalent to the environmental-benefits attributes of one MWh of renewable energy.

(T)

Availability of Service

This rider is available to any retail member on any rate schedule.

Option A - Retail members may participate in the program by contributing monthly as much as they like in \$2.75 increments. (e.g. \$2.75, \$5.50, \$8.25, or more per month.) The retail member may allocate a “Renewable Energy Program” contribution to a type or types of renewable energy offered by the Envirowatts program (solar, wind, hydroelectric, or landfill gas). Funds contributed by retail members are not refundable.

Option B – Option B is a pilot program and is available on or before March 25, 2025. A retail member may, after entering into a special agreement with Fleming-Mason Energy and EKPC, purchase renewable energy to offset the retail member’s existing energy consumptions under the member’s applicable rate schedule.

DATE OF ISSUE: November 1, 2021

DATE EFFECTIVE: December 1, 2021

President and Chief Executive Officer

Option C – After entering into an agreement with Fleming-Mason Energy and EKPC, commercial and industrial (“C&I”) retail members have the opportunity to purchase RECs through Fleming-Mason Energy and EKPC to offset up to all of their energy consumption with RECs, resulting in that portion of energy consumption to be considered renewable.

↓

Eligibility

Under Option A, a “Pledge to Purchase Renewable Energy” must be signed by the retail member prior to service under this rider. Retail members may not owe any arrearage prior to participating in the Renewable Energy Program.

Under Option B, a retail member must execute an agreement with Fleming-Mason Energy and EKPC to purchase, supply, or secure a minimum renewable capacity of 1MW. The maximum annual renewable energy under the agreement cannot exceed the participating retail member’s average annual consumption over the previous three (3) years. For new businesses with no usage history, the maximum annual renewable energy under the contract will be estimated. The type of renewable energy will be determined by the retail member. Retail members having multiple services across the EKPC system may aggregate consumption and renewable energy totals into a single agreement.

Under Option C, C&I retail members, in conjunction with Fleming-Mason Energy and EKPC, will determine the type of renewable resource and amount of RECs Fleming-Mason Energy and EKPC will purchase monthly on behalf of the participating retail member. The original agreement will expire after one (1) year, but will automatically renew monthly until the retail member provides 60 days’ notice of cancellation. The retail member may also amend the agreement to change the amount of RECs or type of renewable resource generating such RECs they will purchase. EKPC may sell and retire RECs generated by EKPC when applicable with a market-based rate per REC.

(N)
↓

The sum of renewable energy purchased under Option B and the RECs purchased and retired under Option C shall not exceed the retail member’s annual usage.

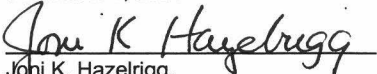

Rate

Under Option A, monthly contributions of any amount in \$2.75 increments shall be made pursuant to the terms of the “Pledge to Purchase Renewable Energy”. The fuel adjustment clause and the environmental surcharge are not applicable to the Option A Renewable Energy Program contributions.

Under Option B, the renewable energy rate shall be set forth under the individual participating renewable energy agreements. The retail member’s bill will be credited for the base fuel, the fuel adjustment clause, capacity credits when applicable, and the variable portion of the Environmental Surcharge that EKPC credited to Fleming-Mason Energy per individual renewable energy agreements. The credit amount is based on the total of the avoided costs from base fuel, fuel adjustment clause, capacity credits when applicable, and variable environmental surcharge for the delivered renewable energy pursuant to the agreement. The total credit will be limited to the lesser of this credit amount or the PJM Localized Marginal Cost.

Under Option C, the participating C&I retail member will pay the market value of the RECs purchased on their behalf without markup from Fleming-Mason Energy or EKPC. They will have the option to instruct Fleming-Mason Energy and EKPC to purchase: (1) RECs covering a set percentage of their energy consumption each month; (ii) a set dollar amount of RECs per month; or (iii) a set number of MWhs. The participating C&I retail member can set a REC price that requires additional approvals for Fleming-Mason Energy and EKPC to purchase RECs per the Agreement. EKPC will act as the participating retail member’s REC purchasing agent including settling the REC market transactions and REC retirements.

Billing and Minimum Charge

Under Option A, the retail member will be billed monthly for the amount the retail member pledged to contribute in their "Pledge to Purchase Renewable Energy." Existing Envirowatts retail participants will be billed at the existing rate of \$2.75 per their existing agreement or pledge.

Under Option B, the retail member will be billed for the renewable energy per the agreement.

Under Option C, Fleming-Mason Energy will increase the participating retail member's electric bill for the RECs purchased at the market price plus a monthly transactional fee of \$100. For any agreement instructing Fleming-Mason Energy and EKPC to purchase RECs in advance of the billing cycle, a monthly carrying charge equal to 1/12 of the annual despot rate set by the Commission will be added to the participant's electric bill.
